

About DCSVintage

DCSVintage offers restoration and repairs of vintage guitar amplifiers, tape recorders, analog processors and collectible home audio components.

We restore vintage home/studio audio components including amplifiers, tape-recorders, turntables, and speaker systems. We strive to preserve the original specifications of your classic tube and collectible audio equipment. NOS and OEM parts are sought and used whenever possible.

Growing interest in vintage studio and home analog audio recorders, reproducers, echo/reverberation effects, and turntables fuels the need for maintenance parts no longer supplied by OEM manufacturers, many of which are no longer around. When parts are needed, Terry's Rubber Rollers and Wheels is an excellent source for vintage restoration rubber parts. We can offer top quality repairs of your Ampex, Berlant/Concertone, BSR, Dual, Otari, Pentron, Pioneer, Philips, Revox, Panasonic/National, Sony, Tandberg, Tascam, Teac, Thorens, VM, and dozens of other brands.

DCSVintage services include evaluation, repair, and restoration of musical instrument tube and hybrid amplifiers such as Ampeg, Danelectro, Epiphone, Fender, Gibson, Marshall, Vox, Magnatone, Peavey, Premier, Regal, Silvertone, Supro, Univox, and Wards. Contact us with your service needs!
